# Noise

Many business properties in our County abut residential areas. Because of this, we ask each business to be good neighbors by keeping all unnecessary noise to a minimum. Businesses which need outdoor public address systems are asked to keep the use to daytime hours and to refrain from using the systems for radio broadcasts so that our residents can continue to enjoy their quality of life outdoors in proximity to the business community.

Where new buildings are located near residences, we ask you to refrain from using public address systems, most notably at:

- Convenience stores
- Auto dealerships
- Gas stations
